Errata for *An Introduction to Statistics with Python*

(2nd Edition, Haslwanter, 2022)

The following book entries are incorrect:

Page	Erratum
P 52	• **"3.1.2 b) More Complex Text-Files"** The correct delimiter option should be `delimiter='[ ,]+'`, since `'+'` in Python regular expression means *"one or more"*. (The `delimiter='[ ,]*'` is incorrect, since `'*'` in Python regular expression means *"zero or more"*.) A flexible, elegant alternative is `delimiter='\s+'`, which means *"one or more white-space characters"*. I also like to add the option `engine='python',` which eliminates the `ParserWarning` message.
P 100 & p 149	• The links for the reference for Button et al. (2013) do not point to the *Bibliography*. Also, the correct corresponding reference there should be: Button, K. S., Ioannidis, J. P. A., Mokrysz, C., Nosek, B. A., Flint, J., Robinson, E. S. J., & Munafò, M. R. (2013). Power failure: Why small sample size undermines the reliability of neuroscience. *Nat Rev Neurosci, 14*, 365–376.
p 109	• *"**6.1.2.1 Standard Deviation and Variance**"* should be *"**c) Standard Deviation and Variance**"* • *"**c) Standard Error**"* should be *"**d) Standard Error**"*
p 110	• *"**d) Confidence Intervals**"* should be *"**e) Confidence Intervals**"* • The expression *"For unknown parameters, the 95%-CI reports the range that contains the true value for the parameter with a probability of 95%."* is not quite accurate. It should be something like *"The 95%-CI reports the range that covers 95% of the observed values for the corresponding parameter for data with the given variability."*
p 156	• The numbers in **Fig. 7.11** are incorrect, and the figure should be replaced with this figure.

	 
p 166	• Chapter heading missing: before *"With the advent of cheap …"* there should be the header ***8.2.5. Statistical Hypothesis Tests vs Statistical Modeling***
p 237	• *"τ_1 and is not included in the matrix ..."* should be replaced with *"τ_1 is not included … "*
